

student grade management platform

We are a platform that manages different information including exams and results of students from different cities, we store the basic information of these students.

We need to know the different information of these students

The information of these students is : Email address, gender, name and surname, city and date of birth.

At the same time, we find the name of the exam and its coefficient, which allows us to identify the student's grade and the date on which the exam was taken.
